Manufacturing Management
System Documentation

Manufacturing Management System

Yunbit MRP revolutionizes manufacturing management with comprehensive planning, managing projects, manufacturing orders and bills of materials efficiently. By **uniting Yunbit ERP and Yunbit SGA**, our tool offers complete functionalities to optimize logistics and production processes.

With **Yunbit MRP**, your company can manage all manufacturing and warehouse operations, integrating it with other business areas for a global and strategic vision. We simplify complex processes with automated workflows, providing daily support to production and warehouse operations.

Our philosophy of constant improvement ensures software adaptable to market changes, without hidden costs or wasted time on updates. **Yunbit MRP** is flexible, adaptable and fully integrated, offering a complete ERP from a single web access point, adapted to mobile devices and at a competitive price.

In summary, **Yunbit MRP** is the definitive solution for companies seeking to optimize their production and warehouse management, simplifying processes, improving efficiency and staying competitive in a constantly evolving market.

Competitive advantages

Complete production planning

Yunbit MRP offers complete production planning and manufacturing order management, optimizing processes and managing resources in real time.

Full integration for comprehensive control

Yunbit MRP links manufacturing and warehouse operations with other business areas of your company to obtain a global and strategic vision.

100% guaranteed efficient automation

With Yunbit MRP you can simplify complex processes with automated workflows, improving operational efficiency.

Limitless adaptability

Yunbit MRP adapts to market changes and the needs of each company, guaranteeing constant evolution without interruptions.

Key functionality, modules and applications

Yunbit MRP offers a wide range of functionalities, modules and applications designed to cover all your company's needs:

- **Work orders:** The production process in Yunbit consists of one or several work orders linked to a manufacturing order. We simplify the complex thanks to automated workflows.
- **Warehouse:** The warehouse management process in Yunbit allows automatic generation of work orders for the warehouse or manual generation of the list of items to be prepared.
- **Orders, items and shipments:** Relocation of items, group picking, inventory, transportation management, cross docking or direct shipments to our clients' customers, material replacements and purchases.
- **Quality and reports:** Yunbit allows you to manage quality inspections associated with items, suppliers, logistics variables, and provide real-time reports for the analysis of KPIs.
- **Materials and resources:** Generate lists of materials that make management easier, faster and more effective: quantity to be produced, raw materials, material resources, human resources, production phases and profitability.
- **Planning:** Obtain a GANTT in which you have all the information about dates, human resources, machines and raw materials. Generate bill of materials to be able to plan efficiently and avoid errors.
